

Vision Problems in New Hampshire

Understanding the prevalence of age-related eye disorders will help policymakers develop better policies and interventions for preventing and treating vision problems. If appropriate preventive steps are not taken, costs will burgeon as the population of New Hampshire ages and life expectancy increases. The number of New Hampshire residents with impaired vision, including blindness, could more than double over the next three decades.

PREVALENCE OF AGE RELATED EYE DISEASE IN NEW HAMPSHIRE

	<i>female</i>	<i>male</i>	<i>white</i>	<i>black</i>	<i>Hispanic</i>	<i>other</i>	<i>total</i>
Hyperopia, age 40 and older	41,353	29,717	69,281	186	572	1,032	71,070
