

Understanding the prevalence of age-related eye disorders will help policymakers develop better policies and interventions for preventing and treating vision problems. If appropriate preventive steps are not taken, costs will burgeon as the population of New York ages and life expectancy increases. The number of New York residents with impaired vision, including blindness, could more than double over the next three decades.

## PREVALENCE OF AGE RELATED EYE DISEASE IN NEW YORK

	<i>female</i>	<i>male</i>	<i>white</i>	<i>black</i>	<i>Hispanic</i>	<i>other</i>	<i>total</i>
Hyperopia, age 40 and older	548,381	346,148	696,403	64,935	80,559	52,633	<b>894,530</b>
Myopia, age 40 and older	1,166,870	959,201	1,586,860	173,751	212,862	152,598	<b>2,126,071</b>
