

Vision Problems in South Carolina

Understanding the prevalence of age-related eye disorders will help policymakers develop better policies and interventions for preventing and treating vision problems. If appropriate preventive steps are not taken, costs will burgeon as the population of South Carolina ages and life expectancy increases. The number of South Carolina residents with impaired vision, including blindness, could more than double over the next three decades.

PREVALENCE OF AGE RELATED EYE DISEASE IN SOUTH CAROLINA

	<i>female</i>	<i>male</i>	<i>white</i>	<i>black</i>	<i>Hispanic</i>	<i>other</i>	<i>total</i>
Hyperopia, age 40 and older	128,858	82,227	176,818	28,351	2,784	3,132	211,085
Myopia, age 40 and older	272,393	228,271	405,933	75,807	9,498	9,427	500,664
Age-related macular degeneration, age 50 and older	18,118	10,055	24,339	3,390	198	245	28,172
